

Standard Specification for Coded Values Used in the Electronic Health Record¹

This standard is issued under the fixed designation E 1633; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification covers the identification of the lexicons to be used for the data elements identified in Appendix X1 of Guide E 1384. It is intended to unify the representations for: (1) primary record of care data elements, (2) the data elements identified in other standard statistical data sets, (3) data elements used in other healthcare data message exchange format standards, or (4) in data gathering forms for this purpose, and (5) in data derived from these elements in order that data recorded in the course of patient care be exchangeable and be the source of accurate statistical and resource management data. This specification is applicable to all paper and automated systems.

4. Significance and Use

4.1 *Purpose*—The approval of Guide E 1384, concerned with the structure and content of the computer-based patient record, now includes a formal indexing of data elements and a cataloging of the minimal essential value set for these elements. Indexing of these data elements with a unique identifier keyed to its position in the logical structure of Appendix X1 of Guide E 1384 now provides a means of cataloging the value sets representing each data element (see Guide E 1384). Specification E 1238, coordinated with Guide E 1239, describes conventions for representing many of the data values for data elements that are included in the more comprehensive listing in Guide E 1384. A comprehensive listing of all of the value sets associated with Guide E 1384 has not yet been assembled. This specification begins to catalog the representation conventions for a number of these elements and in particular to list the coded values. It is important that this catalog consider the traditionally assigned representations for each of these elements, and it must resolve differences in a manner that introduces systematics and consistency into the representation. The catalog must establish both a global framework consistent with international standardization and with long-term growth, while at the same time maximizing familiar or traditional representations. This standard has been developed with input from many organizations, including government agencies and other standards bodies and professional

associations, and as a result of the effort to achieve consistency and comprehensiveness among the data dealt with by various standards efforts.

4.2 General Values—Early in the coordination of healthcare information standards an informal body, the Healthcare Information Standards Coordinating Committee (HISCC), identified certain common data element types and agreed upon conventions for representing these data element types in a standard manner. This set the stage for the development of the value sets for the CODED VALUE data type. The status of the standard noncoded data types, and their representations, agreed upon by the HISCC are:

4.2.1 Person Names—Specification E 1238, Guide E 1239 and HL-7 use the same representation for American and European forms.

4.2.2 Addresses—Common format in Specification E 1238 and Guide E 1239.

4.2.3 Telephone Numbers—Specification E 1238 and Guide E 1239 currently use the same representation with area code enclosed in parentheses and country code preceding the parentheses.

4.2.4 Dates—Date and time represented as ANS X3.51-1986/ISO 8601-1988 with years in four digits; time not separated from date by “T” as permitted by ISO 8601.

4.2.5 Numbers—Numbers are represented either as integers or fixed point numbers; exponential notation not presently accepted in Specification E 1238, Guide E 1239, or HL-7. Units of Measure by ISO 2955-1983 or ANS X3.50-86.

4.2.6 Strings—7-bit ASCII characters; multilingual character sets not yet defined.⁵

5. Assignment of Coded Values

5.1 The major important data elements in Guide E 1384 having coded data types and the current status of the cataloging of their values are:

01035	Patient Multiple Birth code (5.2.23)
01040	Sex (5.2.20)
01042	Race (5.2.3)
01045	Ethnicity (5.2.4)
01047	Religion (5.2.7)
01052	Marital status (5.2.2)
01055	Nationality/Country of Origin (5.2.6)
01057	Language (5.2.5)
01060	Educational Level (5.2.8)
	Educational Certification (5.2.9)
01062	Current Work Status (5.2.24)
01065	Occupation (5.2.11), also 01070,01090.03
01067	Current Vocational Status (5.2.25)
01085	Usual Living arrangement (5.2.26)
01099	Foreign Residency Code (5.2.27)
01090.03	Family Relationship (5.2.10)
01155	Color Eyes (5.2.38)
01160	Color Hair (5.2.39)
01175	Body Build for Identification (5.2.40)
02052	Durable Power of Attorney Status (5.2.28)
04001.50	Professional Specialty (5.2.16)
09001.12	Body System/Region (5.2.22)
14001.A002	Patient (Encounter) Type/Admission Source (5.2.17)
14001.A004	Confidentiality Status (5.2.1)
14001.A013	Facility Care/Healthcare setting (5.2.18)
14001.A016	Reason for Visit (5.2.19)

14001.A021	Mode of Arrival (5.2.29)
14001.A030	Nature of Injury (5.2.30)
14001.A033	Mode of Injury (5.2.31)
14001.A034	Product of Injury (5.2.37)
14001.A044	Protective Equipment Used (5.2.32)
14001.A063	Patient Admission Type (5.2.12)
14001.A110	Professional Speciality (5.2.16)
14001.A133	Accommodation type (5.2.15)
14001.A163.01	Patient In-residence Transfer Type (5.2.13)
14001.A170	Diagnosis (5.2.33)
14001.A170.01	Diagnosis Type (5.2.34)
14001.A170.02	Diagnosis Status Code (5.2.35)
14001.A186.01	Current Clinical Status (5.2.36)
14001.A223	Source of Payment Code (5.2.21)
14001.F050	Discharge Disposition Category (5.2.14)

This standard identifies the current value list for each of these elements as of the approval date of this standard (see footnote 1) and states the evolving status of this catalog as the knowledge of the use of these elements expands as a result of ongoing investigation. Each element is identified by the index assigned to it in the revised Appendix X1 of Guide E 1384. Moreover, the definition for that element from the Data Element Catalog (5) is included with the value set.

5.2 Value Set Tables—These tables collect the representation of coded data values for specific data elements in computer-based patient record structures identified in Appendix X1 of Guide E 1384. The terms listed here are the minimal essential ones but may be further subclassified to include more specific terms by appropriate extensions of the included terms.

5.2.1 Confidentiality Status—This data element, Index: 14001.A004, contains the minimal commonly used values appearing in both manual and automated systems. See Specification E 1238.

Unwed mother	UWM
Celebrity	VIP
Psychiatric patient	PSY
Employee	EMP
AIDS patient	AID
HIV patient	HIV
Alcohol/Drug patient	ETH
Usual control	U
Restricted	R
Very restricted	V

5.2.2 Marital Status—This data element, Index: 01052, encompasses the values noted by Westermeyer (6), Bureau of Census, the VA DHCP system, the DoD CHCS system, the X12 835 Transaction Set (7), UB-82 (8), and used in common practice.

Never married	B
Single	S
Married	M
Divorced	D
Divorced/annulled	L
Divorced/separated	H
Annulled	N
Widowed	W
Separated, NOS	A
Separated, legal	E
Separated, nonlegal	K
Marriage, separation, temporary absence	X
Marriage, separation, permanent absence	V
Consensual union	J
Unknown	U
Common Law	C
Domestic Partner	P
Registered Domestic Partner	R
Living together	G
Interlocutory	I

5.2.3 *Race*—This data element, Index: 01042, indicates the region of the world from which the patient's ancestors came. This is a biologic attribute that very generally indicates possible biologic diversity to which the patient might be subject. Due to ambiguity inherent in the diversity of the large number of inherited attributes which might characterize such ancestry, other data elements of the care record will be required to assign meaning to the value set recorded for this attribute. Therefore, utilization of these other attributes is strongly recommended. Currently, to be consistent with census data, the six values given in OMB Directive 15 are recommended.

American Indian/Alaska Native	1002-5
Asian	2028-9
Black	2054-5
Hawaiian/Pacific Islander	2076-8
White	2106-3
Other	2131-3

5.2.4 *Ethnicity*—In keeping with current demographic practice, this data element, Index: 01045, reflects the ethnic cultural group with which the patient identifies. Multiple selections may be made. Each value has associated with it an ancestral cultural origin tag that is most closely associated with the ancestral geographic origin of that cultural pattern. This tag does not signify the ancestral biologic characteristics of the individual which is recorded in other data elements of the record. See Fig. 1.

5.2.5 *Language*—This data element, Index 01058, is specified by the two character lower case code in ISO 639 Table 1. The upper case three character code, now in ISO balloting may be added in a future revision of this specification. The language symbol only is shown here, but an original name and French language name are available (see Fig. 2 for list).

5.2.6 *Nationality/Country of Origin*—This data element, Index: 01055, Citizenship, is specified by ISO 3166. The two letter codes are shown here. A three letter and a numeric code exists for each entry. New entries may be added in the future.

5.2.8 Educational Level—This data element, Index: 01060, is stated such that the general level and year within that level is expressed in a way that comparably reflects the educational practice in most national settings.

E1 to E8 Elementary
S1 to S4 Secondary
C1 to C5 College Baccalaureate
P1 to P9 Professional

5.2.9 Educational Certification—This data element reflects the Certification of Educational Experience for credentialing of healthcare practitioners. It reflects the terminology used by the Dept. of Veterans Affairs, the Dept. of Defense, and state licensing agencies.

5.2.11 Occupation—This data element, Indices: 01065.—Current Occupation, 01070.—Previous Occupations and 0.1090.23—Family Member Occupation, reflects the terms used in the Standard Occupational Classification 1996 (2), those used in the U.S. 1990 Census (1) and those in the ILO list of International Standard Classification of Occupations 1968 (ISCO-68) incorporated into SNOMED (3). ISCO – 88 includes a four digit code that is the basis for several national systems for classifying occupations. SNOMED-III, released in 1993, continues to use ISCO-68. This scheme also includes terms from the Occupation Employment Survey (2) which is being incorporated into the new classification by the US Dept. of Labor, Bureau of Labor Statistics beginning in 1997 replacing older schemes. The terms listed here from that new scheme have been cross referenced to these older schemes in coordination with the US Dept. of Labor. The new vocabulary is intended to be able to also relate health care resource management issues to the labor market. See Fig. 3.

5.2.12 Patient Admission Type—This data element, Index: 14001.A063, is used to categorize the type of inpatient encounter but is not used for other encounter types.

Admission, pre-admit (elective)
Admission, walk-in (urgent)
Admission, emergency room
Admission, referred

5.2.13 Patient Transfer Type—This data element, Index: 14001.A163.01, is used to characterize the movement of inpatients either physically or administratively between nursing units.

Inter Clinical Care Unit
Inter Clinical Service

5.2.14 Discharge Disposition—This data element, Index: 14001.F050, is the general nature of the activity to which the patient is consigned following the encounter, either inpatient or ambulatory. A separate data element contains the specific name of the destination.

Acute Care Facility
Expired

5.2.15 Accommodation Type—This data element, Index: 14001.A133, denotes the clinical service, or organizational unit dedicated to a particular professional specialty or orientation, to which the patient is assigned and is responsible for that patient's care.

5.2.16 Professional Specialty—This data element, Index: 04001.50, is the nature of the professional specialties held by a practitioner and include the terms used by the ANSI X12835 Transaction Set (7), UB-82 (8), the American Medical Association, American Dental Association, the American Nurses Association, and other professional bodies providing licensed or certified practitioners. This list (see Fig. 4 for list) may not be complete and may also be included with the Standard Occupational Classification system noted above as extensions to the scheme. At this time, however, it is presented separately until agreement on such an approach is reached.

5.2.17 Patient Type—This data element, Index: 14001.A002, reflects the type of the patient presenting for an encounter in terms of the nature of services to be provided. It includes the categorizations used in the NCVHS Standard data sets.

Emergency: NOS
Emergency Trauma Level 1
Emergency Trauma Level 2
Emergency Trauma Level 3

5.2.18 Facility Type/Healthcare Setting—This data element, Index: 14001.A013, categorizes the healthcare setting provided by the facility at which the encounter occurs. It reflects the terminology used in the NCHS Standard data sets and that in Guide E 1384, which contains all of these categories (see Fig. 5 for list).

5.2.19 Reason for Visit—This data element, Index: 14001.A016, reflects the reason the patient sought the services of a healthcare provider.

NCHS Reason for Visit list (4)

5.2.22 Body System/Region—This data element, Index 08095, 09001.12, 09001.13, refers to subjective or objective observations that are organized by anatomic systematic to be comprehensive, such as review of systems. The patient's subjective observations, symptoms, and the practitioner's objective observations from examination all should be categorized using a common basic terminology. These categories have been derived from the U.S. Government SF88 and SF93, the OSHA forms, and common anatomy texts.

Post-secondary vocational training
Post-secondary education

5.2.26 Usual Living Arrangement (Index: 01085.)—This value set depicts the environment in which the patient resides and should include:

Lives alone	A
Lives with a family member other than spouse	R
Lives with parents	P
Lives in a group	G
Lives with spouse	S
Lives with an unrelated person	N
Institution	I
Unknown	U

5.2.27 Foreign Residency Code (Index: 01099.)—This value set depicts whether the patient regularly resides outside the nation of his/her permanent residence and should include:

No regular foreign residence
Foreign residence less than 25 %
Foreign residence 25-50 %
Foreign residence greater than 50 %

5.2.28 Durable Power of Attorney Status (Index: 02052 and 02053.)—This value set indicates what level of durable power of attorney is part of the patient's estate. The value set is:

None
On file
Written

5.2.29 Mode of Arrival (Index: 14001.A021.)—This value set serves not only emergency encounters but also any type of encounter where the mode of arrival is an important aspect of patient care. The minimal value set shall include:

Ground ambulance
Helicopter ambulance
Fixed wing air ambulance
Ambulance not otherwise specified
Walk in following transport via private transportation

Walk in following transport via public transportation
 Walk in following non ambulance - law enforcement transport
 Walk in not otherwise specified
 Other mode of transport
 Unknown mode of transport

5.2.30 *Nature of Injury* (Index: 14001.A030.)—This value set applies to any encounter where and injury occurs. Its values are taken from the ICD-9CM/ICD-10 coding scheme in the range 800 to 999, or the corresponding SNOMED International components which map into ICD-9CM/ICD-10.

5.2.31 *Mode of Injury* (Index: 14001.A033.)—This value set is taken from the ICD9CM “E-Code” table, the corresponding segment of ICD-10 or that of SNOMED International.

5.2.32 *Protective Equipment Used* (Index: 14001.A044.)—This value set indicates protective equipment used on the job or devices used in any environment (such as a vehicle) and should include:

Safety Equipment:
 None used
 Shoulder Belt only used
 Lap Belt only
 Shoulder and Lap Belt used
 Child safety seat used
 Helmet used

5.2.33 *Diagnosis* (Index: 14001.F030/A170.)—This value set is the list of conditions at encounter disposition. Codes may be drawn from the latest ICD-9-CM table or ICD-10 version, when mandated, or other diagnostic code system. It may be a code or associated rubric index into the code table. Additional codes may be applied using alternative coding schemes.

5.2.34 *Diagnosis Type* (Index: 14001.F030.01.)—This value set indicates the purpose/level of significance of the code/term of diagnosis and should include:

Principal
 Primary
 Secondary
 Complication

For 14001.A.170.01 it should also include admitting.

5.2.35 *Diagnosis Status Code* (Index: 14001.F030.02/A170.02.)—This value set indicates the finality of the assignment of the code/term and should include:

Active
 Chronic
 Acute

5.2.36 *Current Clinical (Patient) Status* (Index: 14001.A186.01.)—The value set indicates severity of clinical status and should include:

Recovered
 Deceased
 Well
 Chronic management required

5.2.37 *Product of Injury* (Index: 14001.A034.)—This value is drawn from the Consumer Product Safety Commission NEIS list.

5.2.38 *Color of Eyes* (Index: 01155.)—This value set indicates the natural eye color for purposes of identification and should include:

Brown
 Hazel
 Blue
 Green

5.2.39 *Color of Hair* (Index: 010160.)—This value set indicates the natural hair color for purposes of identification and should include:

Blond
 Brown
 Black
 Red

5.2.40 *Build for Identification* (Index: 01175.)—This value set indicates the general body build for purposes of identification and should include:

Slender
 Medium
 Heavy

5.2.41 *Isolation Status Code* (140001.A143)—Warning/Isolation status. This element 14001.A143, shall have the following values:

ARP	antibiotic resistance precautions
BP	blood and needle precautions
ENP	enteric precautions
NP	precautions for neutropenic patient
PWP	precautions for pregnant women
RI	respiratory isolation
SE	secretion/excretion precautions
SI	strict isolation
WSP	wound and skin precautions

5.2.42 *Clinical Order/Specimen Action* (10001.013/10001.101.05)—Clinical Order Action/Specimen Action/Code. This element, Index 10001.013/10001.101.05, shall have the following values:

A	Add the ordered tests or batteries to an existing specimen with the patient identifiers and date-time given in this record.
C	Cancel order for the battery or tests named
G	Generated order. This study was initiated by diagnostic service; for example, (one or more) orders for antibiotic sensitivity can be initiated by the lab when organisms grow out of a bold culture.
H	Hold order until time specified by the quantity-timing field
L	Laboratory to obtain a specimen instead of receiving one from the practice
N	New orders accompanying a new specimen
P	Pending specimen. Order has been sent prior to delivery of needed specimen. Practice will provide specimen.
R	Revised order
S	Schedule the tests specified below

5.2.43 *Clinical Order Priority* (10001.015)—Clinical Order Priority. This element, Index 10001.015, shall have the following values:

5.2.44 *Clinical Order Appt Transport Status* (10001.091)—Clinical Order Appt Transport Status Codes. This element, Index 10001.091 shall have the following values:

PORT Portable study The examining device goes to patient
CART Cart Patient travels on cart or gurney to the diagnostic service
WHLC Wheelchair Patient must be transported by wheelchair
WALK Walk Patient walks to the diagnostic service

5.2.45 *Military Service/Veteran Status* (01050)—Military SVC/Veteran Status. This element, Index 01050 shall have the following values:

NOAA
USA
USN
USAF
USCG
USMC
USPHS

5.2.46 *Order Confirmation Recd Code* (10001.057)—Order Confirmation Recd Code, Index 10001.055, shall have the following values:

Order was cancelled	CA
Order was completed	CM
Order was discontinued	DC
Error, Order not Found	ER
Order is on Hold	HD
In Process, Unspecified	IP
Order has been Replaced	RP

5.2.47 *Diagnostic Service Code* (10001.010)—Diagnostic Service, Index 10001.010 shall have the following values:

AU	Audiology
BG	Blood gases
BLB	Blood bank
CUS	Cardiac ultrasound
CTH	Cardiac catheterization
CT	CAT scan
CH	Chemistry
CP	Cytopathology
EC	Electrocardiac (for example, EKG, EEC, Holter)
EN	Electroneuro (EEG, EMG)

LVG	Left ventragluteal	RVG	Right ventragluteal

5.2.50 *(Medication) Administration Device* (12001.40A; HL7 Table 0164)—(Medication) Administration Device shall have the following values:

AP	Applicator	IVS	IV solution
BT	Buretrol	MI	Metered inhaler
HL	Heparin lock	NEB	Nebulizer
IPPB	IPPB	PCA	PCA pump
IVP	IV pump		

5.2.51 *(Medication) Administration Method* (12001.40B; HL7 Table 0165)—(Medication) Administration Method shall have the following values:

CH	Chew	NB	Nebulized
DI	Dissolve	PT	Pain
DU	Dust	PF	Perfuse
IF	Infiltrate	SH	Shampoo
IS	Insert	SO	Soak
IR	Irrigate	WA	Wash
IVPS	IV piggyback	WI	Wipe
IVP	IV push		

5.2.52 Result Status/Observation Result Status (10001.120.03/)—Observation Result Status Code, Index 10001.120.03 shall have the following values:

F	Verified final results are all available, order is complete.
P	Preliminary: Some of the verified preliminary results are available. ^A Additional or confirmatory reports may be expected.
M	Some of the verified final results are missing (some are also present). (new)
I	Order and all applicable specimens received, procedure incomplete.
R	Results stored, not verified.
C	Correction of (a) previously transmitted result(s).
S	Procedure scheduled, not complete.
O	Order received, specimens not received or are incomplete.
D	Order deleted by requestor. (new)
X	Procedure cannot be done, order cancelled.
Y	No order on record for this procedure (in response to query).
Z	No record of this patient (in response to query).

Priority: ZYXDOSIRPMFC^B

^A Preliminary means interim values of a long term test, such as a microbiologic test, or reports that have been typed but not reviewed by the interpreter.

^B Priority indicates the temporal order in which codes may replace one another.

R	Result entered, not verified.
P	Preliminary: A verified early result is available, final result not yet obtained.
F	Result complete and verified (final).
C	Corrected: Reported final result is superseded by a verified, modified result.
I	Specimen received, procedure incomplete.
D	Previous preliminary or final result/observation is deleted.
X	Procedure cannot be done, order cancelled.
U	Previously transmitted result status changed to final-results unchanged
S	Partial results

Priority: XDISRPFUC^A

^A Priority indicates the temporal order in which codes may replace one another.

5.2.53 Clin Order Response Action (10001.058)—Response shall have the following values:

E	Report Exception Only
R	Same as E, also replacement and parent-child
D	Same as R, also other associated segments
F	Same as D plus confirmations explicitly
N	Only MSA segment is returned

5.2.54 Abnormal Change Code (11001.01.57.03)—Abnormal Change Code Index 11001.01.57.03 shall have the following values:

L	Below low normal
H	above high normal
LL	Below lower panic limits
HH	above upper panic limits
<	below absolute low, that is, off low scale on an instrument
>	above absolute high, that is, off high scale on an instrument
N	Normal
A	abnormal-applies to non-numeric results
AA	very abnormal-applies to nonnumeric results (analogous to panic limits for numeric units)
Null	no ranges defined or normal ranges do not apply to this test result
U	significant change up
D	significant change down
B	better, use when direction not relevant or not defined
W	worse, use when direction not relevant or not defined

5.2.55 Antibiotic Susceptibility (11001.01.60.02)—Antibiotic Susceptibility Code; Index 11001.01.60.02 shall have the following values:

R	the give organism is resistant to the antibiotic
I	the sensitivity is intermediate
S	the organism is sensitive to the antibiotic
MS	moderately sensitive
VS	very sensitive

5.2.56 Abnormal Range Check Code (11001.01.57.04)—Abnormal Range Check Code; Index 11001.01.57.04 shall have the following values:

A	denotes that an age-based population was tested
S	a sex-based population
R	a race-based population
N	generic normal range

5.2.57 Specimen Additives (10001.101.06)—Specimen Additives Code Index 10001.101.60 shall have the following values:

Lithium Heparin-anticoagulant	LIH	Green	Dry powder. 10 to 30 USP units per mL of blood.
Sodium Heparin-anticoagulant	NAH	Green	Dried solution. 10 to 30 USP units per mL of blood.
Ethylenediaminetetraacetic acid; K2E dipotassium salt [EDTA (K ₂)]	Lavender		Dry powder. 1.5 to 2.2 mg per mL of blood.
Ethylenediaminetetraacetic acid; K3E tripotassium salt [EDTA (K ₃)]	Lavender		Clear solution. 1.5 to 2.2 mg per mL of blood.

5.2.58 Order Timing Interval (1001.067)—Order Timing Interval; Index 10001.067 shall have the following values:

(a) Q<integer>S ^A	= every <integer> seconds
(b) Q<integer>M ^A	= every <integer> minutes
(c) Q<integer>H ^A	= every <integer> hours
(d) Q<integer>D ^A	= every <integer> days
(e) Q<integer>W ^A	= every <integer> weeks
(f) Q<integer>L ^A	= every <integer> (Lunar cycle)
(g) Q<integer>J ^A	= every week on the <integer> day of the week. 1 = Monday, 7 = Sunday (we use J from the French, "jour")
(h) BID ^A	= twice a day at institution specified times (for example, 9 AM-4 PM)
(i) TID ^A	= three times a day at institution specified times (for example, 9 AM-4 PM-9 PM)
(j) QID ^A	= four times/day at institution specified times (for example, 9 AM-11 AM-4 PM-9 PM)
(k) QAM	= in the morning at institution specified time
(l) QSHIFT	= during each of 3 eight hour shifts at institution specified times
(m) QOD	= every other day
(n) QHS	= every day before the hour of sleep
(o) QPM	= in the evening at institution specified time
(p) C	= service is provided continuously between the start time and the stop time
(q) U<spec>	= for future, where <spec> is the service intervals defined/processed by syntax of UNIX crontab
(r) Once	= one time only. This is also the default when this component is null.

^A Not equivalent to their Q<integer>H counterpart. QID is not the same as Q6H. The former is unequally spaced. The latter is equally spaced.

5.2.59 Order Timing Duration (1001.067)—Clinical Order Timing Duration; Index 10001.067 shall have the following values:

S <integer>	do for <integer> seconds
M <integer>	do for <integer> minutes
H <integer>	do for <integer> hours
D <integer>	do for <integer> days
W <integer>	do for <integer> weeks
L <integer>	do for <integer> months
X <integer>	do <integer> times at interval specified in the order. For two blood cultures Q2H X3 would imply obtaining two blood cultures three different times at two hour intervals for a total of six blood cultures.
T <integer>	do at the interval and amount stated until a total dosage of <integer> is accumulated. Units are assumed to be the same as in the QUANTITY field.
INDEF	do indefinitely. This is also the default if the value is nil unless once is specified as the repeat interval.

5.2.60 Observation ID Suffix (11001.01.51)—Observation ID Suffix; Index 11001.01.51 shall have the following values:
